

You say
accountant

like it's a
boring thing.

Professional
SOLUTIONS
G R O U P, L L P

Hey, there's
nothing
boring
about your
financial success.

CPA *Anything but typical!*TM

We're PSG.
Our job is to save you money
on your taxes and your business.
How can that be boring?!

We're businesspeople who happen to be tax experts. PSG gets extraordinary results, not because we're great with numbers (although we are), but because we've owned a number of successful businesses. We approach accounting in practical business terms. We get excited by the same thing you do: seeing you succeed.

Tax planning and preparation... with an inside edge.

Our partners employed large-client tactics during our Big Four accounting firm days. Now we apply these same tactics to our small and mid-sized business clients, as well as families and individuals.

We've also worked *inside* the Franchise Tax Board. We understand how the other side thinks, thereby minimizing the risk of an unfriendly visit.

Not all tax advisors are businesspeople. We are!

Too often clients come to us with tax information that's blatantly wrong.

Our job is to dispel these myths; replacing bad advice with good.

We understand business and taxes are complicated. PSG strives to simplify

both. We empower clients to use the tax laws to their advantage.

When was the last time you talked to your accountant about...

Your breakeven point

Expanding your business

Growing your business controllably

Exit strategy

Planning for early retirement

Human resource issues

Workers compensation exposure

Limiting your liability

You'll find all PSG accountants financially savvy, as well as...

Insightful

Bold

Creative

Plain speaking

Incredibly easy to work with

Committed to your prosperity

Our bottom line is your success.

Okay, we admit it. We do care about numbers. We care about numbers that increase your financial well-being.

Through strategic tax planning, preparation and business consulting

we look for every possible savings we can find. PSG's goal is to keep more of your money in your business... and your pocket.
